3. PERSONAL PROJECTS

- A drawing board kind of program for making pictures in text mode using graphical characters for the DOSBOX platform. The drawing could be saved to a set of 3 files containing the characters, the background color and text color for each of them(chars). This project made drawing the UI of other programs easy which at the end became useful for my Academic Project in class XII.
- **Tic-Tac-Toe** – Again for the DOSBOX platform
- **Calendar** for the any month of a four digit year(DOSBOX)
- **Expression calculator** – For calculating any mathematical expression. [<https://github.com/Compro-Prasad/calc>]
- **Local Git Manager** – For checking out a new project faster than ever. [<https://gitlab.com/Compro-Prasad/lgm>]
- **Trees** – A *test library* for polishing the concepts on trees and making libraries in C++. [<https://github.com/Compro-Prasad/trees>]
- **Advanced Expression Calculator** – A rewrite of my expression calculator, this time with more features(*Under Development*) [<https://github.com/Compro-Prasad/advCalc>]
- **Online Org Mode Editor** – *Future Plan*. Not yet started.

4. ACADEMIC PROJECTS

- **Student management** in C++ for the DOSBOX platform using concepts from file handling and classes and objects. It had a good interface for interacting with the backend.
